

Communicator software

Efficient control & diagnosis of your digital cinema projector

Features

- Available for Windows, Mac OSX and Linux users
- Fast troubleshooting with the 'Diagnostics Companion' function
- Full editing of color look-up tables, gamma, etc. (post production version)
- Remote access to the projector from anywhere on the network
- 'Traceability' in case projector misuse (based on user login)
- User-configurable layout to suit personal user preferences
- Compatible with any Barco Series II and Series I projector (except DP 30 and DP 50)
- Compatible with all currently available 3D technologies (in combination with any Barco digital cinema projector)

Communicator is an intuitive software tool specifically designed to efficiently control and diagnose your digital cinema projectors. The software comes as a standard component with all Barco DC projectors.

A single point of access

Communicator is all you need to install, operate and diagnose your full fleet of Barco digital cinema projectors. In addition, it allows you to remotely control your external server, thus making it a single point of access to your complete DC setup.

Compatible with any model

Communicator is ideally suited for multi-user command & control and is compatible with any Barco DC projector. Thanks to its user-friendly interface, it ensures a short and enjoyable learning curve.

Communicator touch panel

- Provides fingertip control over the projector's lamp, lens, dower, test patterns, diagnostics, presets, server, etc.
- Optionally available on all Barco DC projectors
- Removable – allows you to use your own Screen Management System display

System interfaces

- USB ports x2,
- RS232 x1
- Ethernet 10/100 Mb/s

LCD panel

- Viewable image size: 8.4"
- Active display area: 800 x 600 pixels
- Dimensions: 170.4 x 127.8 mm

Communicator functionality

User definable access rights

You can define the level of control and access to your projectors by creating multiple users and assigning custom access rights to each of these users.

Snap shot of projector status

A snap shot of a projector's current status can be displayed at the touch of a button.

Projector cloning

When you have set up one projector, you can simply create a clone file and apply your preferred settings to all other projectors. This minimizes setup time & dark time, reduces cost and ensures consistency from one screen/site to another.

Diagnostics Companion

Communicator software does not only enable you to set up and control a projector; it also notifies you of issues as and even before they occur.

In the event of a failure, the Diagnostics Companion function (included in the Communicator software) will provide a brief description of the issue. It will also indicate the problem's most likely cause and immediately suggest remedial actions at the touch of a button.
